

## **Subhadeep Sengupta**

**Designation:** Guest Faculty

**Subject:** Mass Communication, Audiography and Sound Editing

### **Details:**

I am a sound designer. More appropriately I like to create sound scapes. Sometimes these scapes remain an entity in themselves and sometimes they provide an appropriate backdrop for actions to happen. The magic however happens when the sound scape interprets the visual scape and vice-versa. So I always strive to achieve this in anything I do. Besides working on location and in the post production stages of film making, I also believe that a greater awareness has to be spread about our surroundings, a greater sensitivity has to be developed and a hyperactivity of the brain is required for that. I believe films are not meant for mere entertainment. Thereby I am actively associated with many teaching institutions (including St Xavier's College, Kolkata and Roopkala Kendro, Kolkata) and am also a subject expert in the UGC Countrywide Classroom. Besides I am involved in various research projects and have lectured in National Seminars organized by UGC. I am from the first batch of Satyajit Ray Film and TV Institute, Kolkata (1996-1999). I won the National Film Award for Best Sound Design in the feature film: "Chitrasutram" in 2010.

Besides working as a professional and teaching, I have other active interests including listening to music and watching films from around the world. I also have a keen interest in making films myself. I am currently involved in making my first documentary project. I love the nature and love trekking and cycling in the mountains.
